

EECS 348 Group Project

Team Log

Meeting: 3

Purpose: Delegate Software Requirements Specifications

Attendees: Everyone - Katie, Shravya, Evans, Ibrahim

Location: Zoom

When: 3/2/2024 4:00-4:20

Note Taker: Katie

Summary

In this meeting, we discussed how we will divide the software requirements specification.

We decided on the following:

Ibrahim - Section 1

Shravya - Section 2 with help from the rest of the team if necessary as it has the most content.

Evans - Section 3

Katie - Section 4

We decided to start new branches in order to keep the repository clean and organized. If this were a real-world project, we would delete the old branches that we used for the Project Management Plan now that the final version is in the main branch. However, we decided to keep the old branches in order to leave a trail of documentation for ourselves and the graders.

We decided to try to finish the document by Saturday, March 9th even though it is not due until March 24th. However, 3 of us have tests this week so March 9th will be our soft deadline and March 20th will be our hard deadline to finish the document.

Two final points, we will not meet on March 23rd due to spring break. And we discussed the possibility of beginning to program or prototype the project when we have extra time.
